Purpose: The purpose of this lab was to experimentally determine graphical and mathematical relationships between specific independent and dependent variables by measuring and recording the diameter, circumference, and area of an assortment of circles. Procedure: Aidan, Alana, and I employed a variety of measures to determine the variables of the circles we choose.

Purpose: The purpose of the Circle Lab was to experimentally determine graphical and mathematical relationships between specific independent and dependent variables. Groups measured the diameter, circumference, and area of various circular objects. Groups could not calculate the area of the circles and therefor relied on alternative techniques.
