Help With The Previous Test

Test for Past Infection (Antibody Test) Updated June 30, 2020 Antibody tests check your blood by looking for antibodies, which may tell you if you had a past infection with the virus that causes COVID-19. Antibodies are proteins that help fight off infections and can provide protection against getting that disease again (immunity).

Test for Past Infection (Antibody Test) | CDC

Scientists are missing a proven tool to help them fight the coronavirus: A blood test that can tell who has been exposed in the past. U.S. scientists are developing one — China may already have one.

This is especially useful when a learner has to re-do a test which he/she previously had poor performance on so that the test is not completed by memory, but rather by actually thinking through the correct solution once again. This feature is also useful to produce more variety by using a large pool of questions from which testing can be done, rather than recycling the same questions over and over.
